BOATING REGULATION SUMMARY

1. Sewage in all pleasure craft, including houseboats, must be retained in suitable equipment.
2. Equipment suitable for the purpose of the Regulation includes:
 - 1) Retention devices with or without recirculation features which retain all toilet waste for disposal ashore.
 - 2) Incineration devices which reduce to ash all sewage and toilet waste.
3. Suitable equipment shall (1) be non-portable, (2) be constructed of structurally sound material, (3) have adequate capacity for expected use, (4) be properly installed, and (5) in the case of storage devices, be equipped with the necessary pipes and fittings conveniently located for pump-out by shore-based facilities. (Although not specified, a pump-out deck fitting with 1 1/2 inch National Pipe Thread (NPT) is commonly used.)

MARINA REGULATION SUMMARY

An Ontario regulation requires that marinas and yacht clubs provide or arrange pump-out service for customers and members who have toilet equipped boats.

In addition, all marinas and yacht clubs must provide litter containers that can be conveniently used by occupants of pleasure boats.

Many of the operators of marinas and yacht clubs offering pump-out service display an illustrated sign on or near their property.

Marina operators have reported obstruction problems when attempting to pump toilet wastes containing wet-strength paper.

PUMP-OUT STATION LOCATIONS

Stations are listed in sequence of geographical location by water route, also by nearest town or community and by body of water.

*Asterisk marks private locations, such as yacht clubs providing pump-out service primarily for members, but available for emergencies by non-members.
